

1

Full height, embossed steel panel; maximum protection! Maximum visibility!

2

Platform made from high tensile steel (so no dents!) and dip e-coated in 6 stage process (so it will last forever!).

3

Three level load lashing and a 400kg gantry capacity; you can lash loads of all shapes and sizes!

4

Double skinned aluminium sideboards used throughout, so your body will look this good for years! The smooth, seamless finish is perfect for your livery!

5

Super strong and striking tailboard with side mounted locks – no nasty finger traps and a big tipping area.

6

Practical integrated tailboard top lashing rail and high visibility markings (chapter 8 compliant) as standard – so generous!
